## Professional Experience \_\_\_\_\_

Aquabyte New York, NY

Senior Machine Learning Engineer Machine Learning Engineer

December 2024 - present June 2022 - December 2024

- Developed custom PyTorch model ensemble (inc. object detection, segmentation, neural fields) to detect sea lice on salmon from underwater imagery with human-level accuracy; optimized for inference speed with TensorRT; deployed as Dockerized application server in AWS
- Built system to integrate model servers into production data pipeline and optimize throughput, scaling inferences from tens to hundreds of thousands of images per day
- · Built ML dataset registry and Python library with common image preprocessing and annotation methods to support computer vision model reproducibility and fast dataset curation
- Conduct live and simulation experiments to estimate effects of new models and research proposals on company objectives
- · Serve on company's ESG committee; wrote report for investor on the company's impact, responsibilities, and plans to advance sustainable aquaculture in the wider industry, establishing internal ESG objectives

Indigo Boston, MA

Soil Data Research Intern, Carbon Experimentation

June - August 2021

- Crafted quantitative framework, analysis, and data visualizations used by the CEO to evaluate risk-reward tradeoffs of key agricultural carbon market opportunities
- Developed generative Bayesian models to create synthetic soil data combining information from published and proprietary data
- Created pipeline to automatically clean, map, and interpret soil sample data for customers

## Research Experience\_

#### New York University, Department of Environmental Studies

New York, NY

Graduate Research Assistant, McDermid Lab

July 2020 - September 2022

- Developed end-to-end deep learning pipeline to detect floods and smallholder croplands in Sentinel-1 and Sentinel-2 satellite image time series over sub-Saharan Africa
- Conducted geospatial time series analysis using econometric modeling techniques to assess the impact of floods on food security in sub-Saharan Africa from 2009-2020 [1]

#### Yale School of the Environment

New Haven, CT

Research Assistant, The Bradford Lab

January 2016 - August 2020

- · Assisted with field and laboratory data collection for experiments studying the ecological function, formation, and rapid measurement of soil organic carbon
- Conducted meta-analysis (data collection, statistical analysis) of long-term experiments to quantify the mediating effect of soil organic carbon on the relationship between conservation agriculture practices and crop yield stability

### Publications.

[1] C. Reed et al., "The impact of flooding on food security across Africa," Proceedings of the National Academy of Sciences, vol. 119, no. 43, p. e2119399119, 2022, doi: 10.1073/pnas.2119399119.

## Education

**New York University** 

New York, NY

Master of Science, Data Science

2020 - 2022

Yale University

New Haven, CT 2015 - 2019

Bachelor of Science, Environmental Studies with distinction, cum laude

• Thesis title: Engaging open-source precision viticulture to manage spatial heterogeneity and improve cover-cropping practice on an organic vineyard (Abstract)

Skills

Python, R, SQL, Bash **Programming** 

PyTorch( Lightning), scikit-learn, experiment tracking (Hydra, Guild AI, W&B), TensorRT **ML Tools** 

**Databases PostgreSQL** 

Git, Docker, Terraform, dbt, Airflow, AWS **DevOps** 

**Statistics** Machine learning, deep learning, computer vision, time series, geospatial, probabilistic models, Bayesian

inference, hypothesis testing, A/B testing, structural causal models, generative models

Other Research, writing, public speaking, food systems, ecology, food security, climate change, music (bass)
